FUNCTION

Timeline

1905
Albert Emil Gebert succeeds in producing the first wooden flushing cistern that is lined with lead and equipped with leaden fittings, under the brand name "Phoenix".

1964
Introduction of the first concealed cistern.

2004
Geberit takes over the German Mapress Group, the largest acquisition in company history.

2014
The Geberit concealed cistern is celebrating its 50th birthday.

2017
Introduction of first Geberit branded ceramics.

1874
Caspar Melchior Albert Gebert (1850–1909) opens a plumber's shop in the Old Town of Rapperswil (CH). At the turn of the century, his two sons Albert Emil and Leo join the company and start the production of wooden flushing cisterns.

1952
The first PVC flushing cistern is produced.

1999
In the year of the 125th anniversary of the company's founding, Geberit succeeds in being listed on the stock market.

2005
Formation of Geberit International Sales AG.

2015
Acquisition of the Finish Sanitec Group with ceramic brands like Keramag, Kolo or Twyford. A completely new chapter for Geberit.

2019
Launch of the revolutionary Geberit SuperTube System.

EVENTFUL
HISTORY

Since the day it all began in 1874 in Switzerland, we have been defined by our experiences. Geberit has been among the pioneers of the industry and is still setting trends with comprehensive system solutions.
With more than 12,000 employees in over 40 countries, Geberit stands for innovation, durability and ecological efficiency.
FROM BEGINNING
TO END

GEBERIT SYSTEMS FOR THE WHOLE BUILDING
Geberit systems deliver solutions for water supply, use, flushing and drainage.

1 SUPPLY
Geberit supply systems are easy to install, have high pressure and temperature resistance and low noise transmission.

2 USE
Geberit owns several ceramic brands that meet all the requirements regarding design, longevity and hygiene. Geberit sanitary systems have continually set trends for more than 125 years.

3 BUILDING DRAINAGE
Geberit waste water drainage systems meet all the expectations regarding an easy installation, reliability, capacity and soundproofing properties.

4 ROOF DRAINAGE
Geberit roof drainage systems cover solutions for domestic, industrial and commercial applications.

ALL INCLUSIVE
Geberit has got more to offer than only products. Through constant research and development Geberit makes sure that their technology and design not only meets the standards but is state-of-the art.

Besides the product range, Geberit offers a lot more services:

CERAMICS & FURNITURE	SANITARY SYSTEMS	PIPING SYSTEMS
LOGISTIC SERVICES	SUPPORT MATERIAL	TRAININGS
SPECS & DESIGN	TECHNICAL SUPPORT	AFTER SALES SERVICE

DESIGN MEETS
FUNCTION

High quality ceramics
and stylish furnishings
create a unique ambiance.
Sophisticated systems and
innovative designs ensure
absolute dependability.
Self-supporting mounting
elements for all plumbing
objects deliver safety and
stability.

GEBERIT ACTUATOR PLATES
A wide range of actuator plates
provides designs for every taste
and for every surrounding: in
private, semi-public or public
bathrooms.

GEBERIT FURNITURE
Be it a mirror, a shelf or a cabinet:
Geberit offers a lot of beautiful
designs for bahtroom furniture.
All made from water-resistant
material.

GEBERIT SHOWER DRAINS
Smoothly integrated in the floor
or the wall: the Geberit shower
drains add a lot to the modern
look of a bathroom.

GEBERIT FLOOR DRAINS
The Geberit floor drain is more
compact than many conventional
floor drains. However, this does not
affect its attractive appearance or
its discharge rate.

GEBERIT AQUACLEAN
The toilet that cleans you with
water. But the Geberit AquaClean
offers a lot more than just a
shower function.

DESIGN
MEETS
FUNCTION

GEBERIT CERAMICS
Washbasins, toilet ceramics,
bidets, urinals: everything
available with Geberit. The whole
bathroom appliances from one
source.

KNOW-HOW
INSTALLED

The piping systems of Geberit stand for know-how in the field of sanitary technology. From supply systems for residential, industry and public buildings, to drainage systems for roofs and buildings, Geberit provides a huge range of products and state-of-the-art technological solutions in the area of hydraulics, fire protection, sound insulation, reliability and environmental properties.

GEBERIT MEPLA
The flexible multi-layer pipes are really easy to install and to be used for drinking water installations and for radiator connections.

GEBERIT PREWALL INSTALLATION
The Prewall Installation can be prefabricated to develop customised solutions for almost any construction project in front of the wall. Furthermore, the installation keeps the sound away from the walls.

GEBERIT MAPRESS
This metal piping system that comes in several different compositions is made for all sorts of supply installations: for domestic but also industrial applications.

GEBERIT HDPE
The product for all seasons: it is a highly flexible, resistant and long-lasting material that can be easily prefabricated

GEBERIT CONCEALED SOLUTIONS

THE TRADITION OF
HIDING CISTERNS

The Geberit concealed cistern is the heart of more than 70 million concealed installations in the bathroom. Every detail of this product is ingenious and has been proven a million times over. Plumbers and end users have trusted polyethylene cisterns from Geberit for more than 55 years.

EVENTFUL HISTORY, CONSTANT INNOVATION. Since 1964 Geberit has been working on product improvements and has constantly developed the quality and functionality of the cisterns. Not only has the product itself moved on, but so too have the product benefits.

BEAUTIFUL DESIGN
The actuator plates are the eye-catchers in your bathroom. A concealed solution with a wall-hung WC offers a lot of design options for your bathroom.

INNOVATIVE AND FUNCTIONAL DESIGN
Some of the actuator plates are available in an easy-to-clean coated option, some in a vandal-proof, screwable version and some can be combined with an odour extraction unit.

WITHSTANDING HEAVY LOAD
The Geberit wall-hung solutions are designed and tested to withstand weights of 400 kg.

SAVING WATER
The water consumption can be sustainably reduced with a Geberit dual flush actuation for the WC. The smaller button flushes with 3 litres, the bigger one with 6 litres and is easily reduced to 4.5 litres.

OPENING SPACE
As soon as the sanitary technology hides behind the wall, a new feeling of space is created. A wall-hung solution makes your bathroom look bigger.

EASY TO CLEAN
The fewer edges, joints and corners, the simpler to clean and more hygienic. Particularly in the WC area, it is better when ceramic appliances are wall-mounted to keep the floor space open.

TOOL-FREE MAINTENANCE
To maintain the actuator plates and the cisterns you do not need tools.

PREMIUM QUALITY
All products from Geberit are known for their very high reliability and durability. This not only ensures safe and trouble-free function, but also reduces maintenance costs. Proven Swiss technology for decades.

↑
GEBERIT DUOFRESH PURE AIR
The Geberit DuoFresh module removes bad air directly from the WC ceramic appliance, purifies it using a ceramic honeycomb filter and then returns it to the room. Thanks to a proximity sensor, the odour extraction always switches on automatically as soon as someone sits down on the toilet. The odour extraction is therefore also a great idea for guest WCs.

Benefit from additional comfort thanks to an LED orientation light. The Geberit DuoFresh module can be easily installed in any Geberit Sigma cistern and can be combined with almost any actuator plate from the Sigma range.

FRESH AIR FOR YOUR WELL-BEING

- Unpleasant odours are extracted right at their source
- Discreet look thanks to the integration of the odour extraction unit into the concealed cistern
- Can be combined with most of the Sigma actuator plates
- Orientation light for the night
- Maximum ease of use

FEEL FRESH
WITH WATER

↑
GET CLEANED WITH WATER
Water is irreplaceable for hygiene and our well-being. It is all the more astonishing that we are satisfied with only toilet paper when going to the toilet.

The Geberit AquaClean is the toilet that cleans you with water. A new kind of personal hygiene that is gentle and natural. It gives you a sense of freshness and cleanliness that you will soon not want to live without. There is a perfect model for every bathroom.

• Perfect model for every bathroom

• Big variety of comfort functions like seat heating, comfort light, etc.

• Whirlspray technology

• Fresh out-of-the-shower feeling

powered by: ISH

iF DESIGN AWARD 2016

GEBERIT AQUACLEAN MERA FEATURES:

↑
ODOUR EXTRACTION UNIT
Unpleasant odours are absorbed at once in the interior of the WC ceramic appliance by the automatically starting, low-noise odour extraction unit and then eliminated through a ceramic honeycomb filter.

↑
DRYER
The dryer arm aligns itself automatically for optimum drying at the last position of the spray arm.

↑
HEATING THE WC SEAT
The ergonomically optimised WC seat made of high-quality thermoset is equipped with an integrated heating element. Thanks to the proximity sensor, the WC seat waits until someone approaches before heating up.

← **ORIENTATION LIGHT**
A discreet light catches your eye and helps you orient yourself at night. Activated by proximity sensor, it lights up in one of seven selectable colour tones and five brightness levels.

iF DESIGN AWARD 2019

GEBERIT AQUACLEAN SELA FEATURES:

↑
TURBOFLUSH TECHNOLOGY
The innovative TurboFlush technology is based on a flow-optimized rimless ceramic pan. This way, the shower toilet can be flushed at any time without any disturbing sounds – even at night.

↑
WHIRLSPRAY SHOWER TECHNOLOGY
AquaClean Sela features the unique, patented WhirlSpray shower technology. The shower spray is refined through dynamic aeration that allows for pleasant and thorough cleaning with low water consumption.

↑
REMOTE CONTROL AND APP
All functions of the AquaClean Sela can be easily controlled from the remote control and Geberit AquaClean App.

← **ORIENTATION LIGHT**
The discreet orientation light is just bright enough to show the way at night and makes it easier to fall asleep afterwards. With a brightness sensor control it is activated in the dark. Available in seven different colours.

GEBERIT MONOLITH

FUNCTIONAL
BEAUTY

The Geberit Monolith changes your bathroom into a well-designed area. Besides the beautiful design, the Geberit Monolith includes all benefits you expect from a Geberit product:

- **Dual flush** saves water
- **Installation is simple** to handle.
- Available in **various trendsetting colours and designs**

BEFORE
with conventional toilet

AFTER
with Geberit Monolith Puro

QUICK SOLUTION FOR RENOVATIONS
The installation of the Geberit Monolith Puro is a simple, quick and clean solution for renovations. The walls do not need to be hacked and existing water and drainage connections can be used, so work is kept to a minimum.

The sleek Geberit Monolith Puro design provides an instant facelift and adds a touch of elegance to your ideal bathroom.

DISCREET
AND SMART

↑
**FLOOR EVEN SHOWER SOLUTIONS
– SHOWER IN STYLE**
The Geberit CleanLine shower channel is an alternative for floor even showers. It has a two-piece design: The trap is mounted below the surface and a sealing foil is firmly connected to the drain to ensure maximum tightness.
On top there is a collector surface in stainless steel, which can be cut to length. It can be placed either close to the wall or in the middle of the shower area.

CROSSING THE CHANNEL
• Two positions for the installation: in the room centre or at the wall
• Unique design with collector surface comb insert and trap
• Simple cleaning and modern linear appearance

↑
GEBERIT WALL DRAIN FOR SHOWERS – INNOVATIVE WALL-DRAINAGE
Floor even solutions for showers are getting more and more popular. An alternative to traditional wet room drainage is the Geberit wall drain for showers which integrates the drainage into the wall. The drain is not interrupting the floor and this opens up the room.
The hair trap can be easily accessed and the removable front cover makes cleaning quick and easy.

DISAPPEARING IN THE WALL
• Never standing on the drain again
• More freedom in your bathroom design
• Classy and highly functional design
• Easy cleaning

INTELLIGENT DESIGN
FLEXIBLE COMPONENTS

↑
GEBERIT URINAL SYSTEM
THE COMPLETE SOLUTION
The Geberit urinal system includes the ceramic, the integrated flush system and the urinal element. Only 0.5 litres of water are enough to ensure an optimal flushing out as the spray-head has been precisely designed to fit the ceramic pan. There are three options of operation: mains or battery operation or as a self-sustaining unit using an integrated generator.
The maintenance is very simple, as the ceramic unit does not need to be removed from the wall.

COMPLETELY CLEAR WHY:
• All from one source
• Easy maintenance
• Water saving
• For mains, battery or self-sustaining operation
• Waterless operation possible
• Quick solution

↑
GEBERIT TAP SYSTEM
TOUCHLESS TECHNOLOGY
The Geberit tap system provides functional reliability, particularly in highly frequented areas. The tap housing is anchored firmly in the Geberit installation element and delicate components are separate from the tap, virtually eliminating the risk of damage due to moisture or vandalism.

TAP DANCE:
• Easy maintenance
• Water saving
• Very hygienic
• Vandal-proof
• For mains or battery operation

BATHROOM CERAMICS PLANE AND GLAZED
Geberit offers a huge variety of ceramic products like toilet bowls and washbasins. Most of the products can be provided with KeraTect, a special fired to form glaze that makes the surface practically non-porous which reduces the building-up of dirt and bacteria. That makes cleaning a lot easier. Rimfree toilets add also much to a hygienic bathroom, as there are no hidden hollow spots. Dirt is easy to see and can be removed in a flash.

CUTTING A FINE FIGURE:
- A vast variety of products available
- Long-lasting quality
- Special fired to form glaze available (KeraTect glaze)
- Hygienic surfaces

- Rimfree ceramics are easy to clean

- Less cleaning agent necessary

- More hygienic as there are no hiding places for germs

A DIRECT PATH TO
THE SANITARY WALL

Insert, align, press shut: Geberit GIS profiles can be permanently joined with the special profile connectors extremely quickly, thus creating a complete support system quickly and without tools out of just two components.

With a dovetail groove, the Geberit GIS profiles are optimally prepared for the installation of the elements. Geberit GIS

profile connectors or Geberit GIS ratchet pins are used to securely fasten them to the prepared support system.

The Geberit GIS mounting brackets ensure that the sanitary wall is securely anchored to the building structure. Sound insulation bases made of cork ensure that the support system is effectively sound decoupled from the building.

↑
Up to four Geberit GIS profiles can be cut to length at the same time with the chop saw.

↑
Assembly of the Geberit GIS profiles: everything is fixed with a single click.

↑
The Geberit GIS mounting brackets with sound insulation bases made of cork ensure that the support system is securely anchored and reliably sound decoupled.

↑
The Geberit GIS installation elements can be fixed quickly and reliably.

←
Half-height and ceiling-height installation walls and room dividers can be created in no time at all and with just a few parts when the Geberit GIS installation system is used.

The Geberit GIS installation system makes creative bathroom designs quick, easy and economical. Free-standing sanitary walls, half-height room dividers, niches and storage areas create a unique feeling of space. Tested and standards-compliant noise and fire protection are already integrated.

FOR UNIVERSAL USE
Geberit GIS offers very flexible applications in new construction and renovations. This means it is suitable for all construction situations, from the small shower bath to the large wellness bath, and also in the object area.

TOOL-FREE INSTALLATION
With tool-free installation, Geberit GIS sets the benchmark for structurally uncompromising but nonetheless rational bathroom solutions.

1 With Geberit GIS, you can realise even the most individual of room designs. 2 With Geberit GIS, bathroom facilities can be positioned just as you desire.

- More living and floor space
- Simple planning andinstallation
- Smaller, consistent pipe diameter
- No additional ventilation pipes
- Horizontal pipelines without slope*

↑
Geberit SuperTube saves space in every direction.

* Up to 6 metres

GEBERIT WASTE WATER DRAINAGE SYSTEMS
DRAINING AT THE
HIGHEST STAGE

↑
GEBERIT HDPE
THE MULTI-PURPOSE SOLUTION
The Geberit HDPE drainage system delivers optimal performance. The system pipes are easily welded and guarantee not only high chemical, thermal and mechanical strength but are also absolutely watertight and possess an extraordinarily high longitudinal strength. Geberit HDPE pipes can even be installed in concrete. Geberit HDPE is ideal for prefabrication. With the majority of work carried out in the workshop, the installation requires just a few simple connections on-site. The light weight of HDPE pipes allows the transport of full assemblies from the workshop to where they are required.

REASONS FOR GEBERIT HDPE:
- Resistant to impact and highly flexible
- Completely leak-proof
- Resistant to chemicals and high temperatures
- Wide range of diameters
- Cast in concrete possible
- Easy to prefabricate away from site

↑
GEBERIT SUPERTUBE
THE SPACE-GAINING SYSTEM
The Geberit SuperTube technology is based on the perfect interplay between four system components. Three clever fittings coupled with the tried-and-tested Geberit HDPE discharge pipe with its high load-bearing capacity combine to create an innovative hydraulic solution that also brings clear additional benefits. These components are permanently welded to ensure a tight connection in the long term.

GEBERIT SUPERTUBE PROS:
- Best solution for high-rise buildings
- Up to 40% more living and floor space
- Horizontal piplines without slope*
- Compatible with Geberit HDPE & Silent-db20
- Simple planning and installation
- Smaller, consistent pipe diameter
- No additional ventilation pipes
- Economic alternative to conventional discharge stacks

↑
GEBERIT SILENT-DB20
MUTED SOUNDS
Geberit Silent-db20 has very good soundproofing properties because of its significantly increased mass. The product is made of mineral reinforced HDPE. The material is UV-resistant due to 2% soot, recyclable, can be welded with Geberit HDPE and its chemical characteristics are like HDPE. The ribs have a vibration dampening effect and reduce the vibration of the pipe and therefore the emission of airborne sound.
THE SOUND OF SILENCE:
- The Geberit Silent-db20 has the same qualities like Geberit HDPE
- Outstanding sound insulation
- System with numerous dimensions and fittings
- Hydraulically optimised fittings
- Safe and permanent connection

GEBERIT ROOF DRAINAGE SYSTEM
THE EFFECTIVE
RAIN SOLUTION

- Over 35 years of experience
- For roofs of factories, warehouses, shopping centres, airports, hotels, sport centres etc.
- High reliability and outstanding durability
- Low system weight
- Discharge of up to 25 litres of rainwater per second

↑
Conventional roof drainage system

↑
Geberit Pluvia syphonic roof drainage system

NOT AFRAID OF CATS AND DOGS
The Geberit Pluvia roof drainage system includes roof outlets, pipes and fittings made of Geberit HDPE. Unlike conventional roof drainage methods, the Geberit Pluvia system functions as a syphonic system. The pipeline fills completely as rapidly as possible and creating a negative pressure. The water is drawn away by suction and not allowed to drain away constantly. This also ensures an improved self-cleaning function.

The system is cost-effective as smaller pipe diameters can be applied and the Geberit Pluvia system uses significantly fewer stacks and less underground pipes. The Geberit Pluvia roof outlets are linked together directly under the roof with a non-sloping collector pipe. Large roof areas can therefore be drained through a single discharge stack.

This simplifies planning and reduces construction time, and it enables planners and architects to go new ways in planning and development of drainage solutions.
There is a wide range of Geberit Pluvia outlets available, allowing the connection with every roof material. They can also be transformed into emergency outlets with an additional installation kit.

10 GOOD REASONS TO GO FOR GEBERIT PLUVIA
- Wide range of applications
- Space-saving
- Less downpipes
- Cost-saving installation
- Less work on-site
- Functions as a syphonic system
- Large areas can be drained through a single discharge stack
- Small pipe diameter
- Less underground pipes, less manholes
- Outlets for all rooftypes

SIMPLY
CONNECTED
• Optimally coordinated system with fittings, pipes and pressing tool with pressing jaw or collar

• Safety during processing: non-pressed connections immediately apparent

• Strictly implemented quality requirements ensure permanently tight connections

• Flexibility and economic efficiency through systems that can be combined with one another

↑
DON'T STRESS. PRESS.
EASY ASSEMBLING
Safe and long-lasting connections are the primary goal in all areas of pipe installation. In addition, a quick and easy installation is important to the plumber. The pressing systems Geberit Mapress and Geberit Mepla meet these requirements perfectly. Transitions between different product materials and systems can be realised without any problems thanks to the numerous adapters. For example, in heating installations, Geberit Mapress Carbon Steel can be used for the basement distribution and the riser pipe and the Geberit Mepla multilayer pipe system for the radiator connection – no need for complicated sealing with hemp or the use of a threaded adapter. Just insert, press, done.

↑
GEBERIT MAPRESS
THE ALLROUND TALENT
When it comes to hygiene, temperature, pressure or aggressive liquids, you will always make the right decision by choosing Geberit Mapress Stainless Steel, which has proven its worth well, not only in domestic installations, but also in industrial plants. Geberit Mapress Stainless Steel has obtained VdS approval as well as all relevant international approvals for use in sprinkler systems.

THE ALLROUND TALENT:
• For extreme requirements in terms of drinking water hygiene and a high load bearing capacity
• Chemical and thermal disinfection possible
• Can be used for a multitude of media using the corresponding seal rings
• Pressing indicator identifies non-pressed connections even before the pressure test
• Large assortment: 11 dimensions from 12 to 108 mm, roughly 500 fittings
• System compatibility with Geberit Mepla and the other Geberit Mapress product materials

↑
GEBERIT MEPLA
THE VERSATILE OPTION
The Geberit Mepla pipe, an aluminium/ PE multilayer pipe, allows for easy, safe and flexible processing, whilst also complying with high hygiene standards. The fittings ensure a high degree of safety during processing as well as reliable tightness. These characteristics make Geberit Mepla especially suited to drinking water supply and radiator connections.

FAST AND FLEXIBLE:
• Inherently stable, flexible and corrosion-resistant
• Non-pressed connections are visibly leaky
• High resistance to pressure
• Pipes and fittings hygienically sealed
• Can be chemically and thermally disinfected
• Suitable for any drinking water quality
• Adapters for all Geberit installation elements
• Adapters for quick connections to Geberit Mapress
